PROJECTS

Telco Customer Churn Analysis

- Proven ROI: Simulate reductions for \$56K immediate savings, targeting "At-Risk Newbies" (49% risk) with incentives.
- Analytics Skills: Used **Python (Pandas, Seaborn)** for **EDA**, RFM/risk segmentation, **SQL** aggregation; integrated with **Power BI DAX/AI** for interactive dashboards.
- Actionable Fixes: Prioritize autopay switches, contract upgrades to retain high-value customers and increase ARPU.
- Visual Insights: Multi-page dashboard with drill-throughs, heatmaps, scatters exposing low-tenure + high-charges (60% churn) risks.

Superstore Sales Profitability Dashboard

- Profit Boost: Uncovered \$70K+ Furniture losses from 48% discounts in Superstore data, enabling 10% reductions for better margins via SQL aggregation and Power BI DAX.
- Analytics Expertise: Used SQL for category/region profits, Excel for KPIs (12% margin, 6.8% loss), Power BI for dashboards with maps, trends, loss flags.
- Recommendations: Pinpointed loss cities (Philadelphia, Houston) and products; advised Technology marketing and dynamic discounts for data-driven growth.

Excel Monthly Report Automation

- Transforms raw, inconsistent files into clean, validated data instantly — no manual cleanup, no errors, and 100% audit-ready output every time.
- Fully **automated** refresh system — just drop new files into the folder and the entire dashboard, **KPIs**, and **logs update** on their own within seconds.
- Built-in Power Query quality checks and logging — detects duplicates, missing values, and anomalies before they ever reach your reports.
- **Dynamic** executive dashboard that highlights real business insights (trends, KPIs, exceptions) so decision-makers get clarity instead of spreadsheets.
- One-click **VBA automation** that eliminates recurring reporting work, saves hours every week, and delivers consistent, professional-level analytics on autopilot.

EDUCATION

High School Diploma

Math & Science

Bogura Government College

📅 September 2022 - April 2024

📍 Bogura, Bangladesh

SKILLS

- Power BI & DAX
- Excel (Power Query, Pivot Tables, VBA)
- Python (Pandas, Matplotlib)
- SQL (PostgreSQL/SQLite)
- Data Cleaning & ETL & Data Visualization
- Statistical Analysis
- GitHub and Version Control
- Data Communication
- Strong Communication Skill

COURSES

- SQL and Advanced SQL for data analytics with [Luke Barousse](#)
- Excel for data analysis with [Luke Barousse](#)
- Power BI with [Luke Barousse](#)
- Python from [BroCode](#)

Summary

Data Analyst skilled in Python (Pandas, Seaborn), SQL (PostgreSQL, SQLite), Excel (Power Query, VBA), Power BI (DAX, AI visuals) for EDA, ETL, cleaning, visualization, stats. Delivered ROI: \$56K telco churn savings via RFM segmentation; \$70K superstore loss insights from discounts. Excel automation saves hours with anomaly detection and dynamic dashboards, driving growth via GitHub and communication.
